PERMIT (Permit not valid unless signed by an authorized official of Plant Health and Pest Prevention Services Division)	PERMIT NUMBER 3740
Under authority of Section 6305 of the Food and Agricultural code, permission is hereby granted to the applicant named above to move and use the organisms described, except as deleted, subject to the conditions stated on, or attached to, this application.	

VIOLATION OF ANY OF THE CONDITIONS OF THIS PERMIT SHALL BE SUFFICIENT CAUSE FOR ITS IMMEDIATE REVOCATION.		
15. SIGNATURE OF STATE OFFICIAL 	16. DATE ISSUED 3/16/2021	17. EXPIRATION DATE 3/31/2023

CALIFORNIA DEPARTMENT OF
FOOD & AGRICULTURE

Karen Ross, Secretary

CONDITIONS OF STATE PLANT PEST PERMIT

Permit No. 3740

1. All regulated organisms or infected plant material shall be shipped in sturdy, escape-proof containers.
2. The permit number shall be affixed on each shipment package containing permitted organisms.
3. Permittee shall maintain a copy of the plant pest permit at the facility where the authorized work will be conducted. The copy of the permit shall be made available to state/county inspectors upon request.
4. Upon the arrival of each shipment of a regulated organism, the permittee shall notify either the Solano County agricultural commissioner at (707) 784-1310 or the California Department of Food & Agriculture (CDFA) Permits and Regulations program via email at permits@cdfa.ca.gov. If the county chooses to waive the notification, the CDFA permits office must be notified.
5. Permittee shall maintain a log of all shipments received at the facility identified in this permit. At a minimum, the permit log shall include for each shipment the type and number of samples received (arthropod/pathogen/noxious weed/nematode), common and scientific name of the regulated organism, the name and address of the receiver and supplier, the date and time of shipment receipt, received, date of county notification, and the number of shipments received by the permittee each month. The log shall be made available to county/state inspectors upon request.
6. If work conducted under the State Plant Pest Permit finds or identifies any plant pest that is not known to occur in California and/or is a quarantine plant pest (regardless of origin) not authorized under a valid permit, the CDFA Permits and Regulations program must be notified within 24 hours at permits@cdfa.ca.gov. Maintenance of these pests is prohibited. It is unlawful for any person who is employed or supported using public funds to neglect to report to the CDFA the presence in California of any pest that is new to or not widely distributed in California (FAC 5308).
7. All packaging and other materials (including all plant material) that come in contact with permitted organisms (including inoculated plants) must be sufficiently heat or chemically treated to kill any regulated organisms that may be present prior to disposal.
8. All permitted organisms and materials shall be kept and used only within the facility, laboratory, or designated area identified in this permit.
9. There is to be no further distribution of regulated organisms without prior approval from state regulatory officials.

10. Authorized state regulatory officials shall be allowed to inspect the facility identified in this permit without prior notice and during business hours to determine compliance with the conditions of this permit.
11. All necessary precautions must be taken to prevent the escape of regulated organisms except in cases where release has been permitted. In the event of an escape of a regulated organism not permitted for release, the permittee shall immediately notify the CDFA Permits and Regulations program via email at permits@cdfa.ca.gov.
12. Unless release has been permitted, all regulated organisms kept under this permit and inoculated plants, if any, shall be destroyed by heat or chemical treatment at the completion of the intended use and no later than the expiration date of the permit, unless an extension is granted by this issuing office.
13. Written request for an extension of the expiration date shall be submitted at least 30 days in advance of the expiration date.
14. All shipments of regulated organisms and commodities must adhere to the applicable sections of the California Plant Quarantine Manual. Information on specific plant pest quarantines can be found at:
http://pi.cdfa.ca.gov/pgm/manual/html/pgm_index.htm#interior.
15. This permit is issued only for the named permit holder at the address identified on this permit. This permit cannot be transferred or assigned. If the permit holder ceases to be employed at the location where the organisms received under this permit are kept, the permit holder must destroy the organisms unless a new individual submits a Form 66-026, obtains a permit prior to the permittee's departure, and assumes responsibility for the continued maintenance of the authorized organisms.
16. Any violation of the conditions of this permit identified during a regulatory inspection must be resolved expeditiously. Upon resolving a violation, the permittee shall immediately notify the CDFA Permit and Regulations program at permits@cdfa.ca.gov.
17. Failure to comply with the conditions of this permit or the detection of any quarantine actionable live plant pest in any shipment authorized by this permit shall be sufficient cause for immediate revocation of this permit.
